# WATER CARE

## BAQUA SPA SYSTEM

**SPA MODEL** _____ **GALLONS** _____

### START UP:

Fill your Hot Tub & turn the power on

Balance Your Water starting with Alkalinity, then checking pH and lastly calcium hardness. Use levels suggested in BaquaSpa Guide

Add Steps #1 & #2 according to the chart below. Run jets for 15 minutes (if your hot tub has a blower do not turn it on whenever you add Baqua Chemicals)

Add Step #3 according to the chart below. Run jets for 15 minutes

Test your water. If the Sanitizer reading is between 30-50 ppm your hot tub is ready to use.

# WATER CARE

## BAQUA SPA SYSTEM

### EVERY 2 WEEKS:

Hose down your filters

### EVERY 2 MONTHS:

Soak your filter(s) in BaquaSpa Filter cleaner

### EVERY 3 MONTHS:

Purge your spa with Clean Start Spa Purge
Drain & Refill your spa
Clean your cover with BaquaSpa cover cleaner

### OTHER TIPS:

To enhance water clarify, pre-dilute steps #1 & #3 by mixing them with a bit of water before inserting into your hot tub.
Wait 15-20 minutes before adding step #3
Remember weekly you will only TEST for Step #3. You may not have to adjust it for weeks at a time!
Annually replace your filters
Tri-X Filters should not be put into the dishwasher
If you have a Tri-X Filter system, use a Paper Filter on the main intake valve

TO LOWER ALKALINITY, USE pH DECREASER
