

WATER CARE: SPA FROG

SPA MODEL _____ GALLONS _____

STARTUP:

1. Fill your hot tub through the filter bucket and turn on the power.
2. Test and adjust your water. Starting with alkalinity, Ph, and lastly calcium hardness.
3. With the jets running, add a bromine startup packet to the filter bucket. Run the jets for 10 minutes.
4. Install the cartridges.
 - Open the mineral cartridge all the way to #6
 - Open the bromine cartridge to a #3.
5. Test the water to make sure the bromine is in the OK range.
6. After 24 hours test your water again and set the bromine so that the bromine level is between 1-2ppm.

OPTIONAL: At this time, you can add Silk Balance or Soft Skin to the filter bucket.

WEEKLY:

1. Test alkalinity, Ph, then calcium levels using test strips. Adjust as needed.
2. Add a dose of oxidizer _____ TBS
3. Add Silk Balance or Soft Skin *optional*

EVERY 3-4 WEEKS:

1. Rinse your filter/s.
2. REPLACE BROMINE CARTRIDGE.

EVERY 4 MONTHS:

1. Drain and refill your spa.
2. Add one packet of bromine start up to the filter bucket.
3. REPLACE MINERAL CARTRIDGE
4. Clean filters with a filter cleaning solution.

OTHER TIPS:

- When putting chemicals into your spa ALWAYS run the jets with the cover OPEN for 20 minutes.
- Purge your spa ANNUALLY using Clean Start
- If you have well water, fill with a clean screen EVERY time.
- Change paper filters ANNUALLY and ceramic filters every 3-5 years.

TO LOWER ALKALINITY, USE pH DECREASER
